

Daily Machine Maintenance Checklist

Purpose:

Provide a routine checklist for identifying machine issues before they cause production disruption.

Applicable:

Production machines.

Daily checks

- Machine cleanliness
- Coolant level
- Cooling-system condition
- Visible leakage
- Abnormal noise
- Abnormal vibration
- Temperature indicators
- Safety systems
- Machine alarms
- Lubrication condition

Recording:

The maintenance/operator record should include:

- Date
- Machine ID
- Shift
- Observed condition
- Action taken
- Status

Escalation:

Any abnormal condition that could affect safety, machine operation, or product quality should be reported to the appropriate maintenance/supervisory personnel.
